💼 Experience

CodeClans
Full-Stack Web Developer
2023 – Present

- Developed and maintained responsive, high-performance web applications using Laravel, Vue.js, Bootstrap, jQuery, MySQL, JavaScript, HTML5, CSS, and AJAX, with integration of RESTful APIs, authentication systems to enhance functionality and user experience.
- Developed backend services with NestJS, Sequelize ORM, and TypeORM, creating RESTful and GraphQL APIs with PostgreSQL and MySQL, using Redis for performance optimization.
- Used Cron jobs and queues to run scheduled tasks and handle background jobs, making the system faster and more efficient.
- Developed and maintained enterprise web applications with C# and ASP.NET.
- Implemented JWT authentication and role-based access control (RBAC) for security.
- Utilized Docker for streamlined application setup and deployment.
- Managed source code using Git, GitHub, and GitLab, integrating CI/CD
- Using Swagger documentation to improve API usability for developers.
- Developed SQL stored procedures and functions to optimize data retrieval for reports, and used database triggers to automate updates, ensuring data accuracy.
- Integrated Mailgun for automated emails and Firebase Cloud Messaging for cross-platform push notifications to boost user engagement.
- Implemented activity logging to track user actions and improve system monitoring and security.

Eazy Partner Solution Co.,Ltd
Web Developer
2021- 2023

- Developed a property management system for leasing, sales, and operations of properties and parking management system.
- Built responsive web applications using HTML, CSS, JavaScript, jQuery, and Alpine.js.
- Designed and implemented complex features with PHP, Laravel, and Livewire.
- Optimized application performance and user experience through data analysis.
- Collaborated with UX/UI teams for seamless design integration.
- Worked with REST APIs, leveraging hands-on experience.
- Continuously learned and adapted to the latest web development technologies.
