Experience

CodeClans
Full-Stack Web Developer
2023 – Present

- Developed responsive, high-performance web apps using Laravel, Vue.js, Bootstrap, jQuery, JavaScript.
- Integrated RESTful APIs, AJAX, and authentication systems to enhance user experience.
- Developed backend services using NestJS (with Sequelize and TypeORM), ASP.NET, and databases including PostgreSQL, MySQL, and SQL Server.
- Created RESTful and GraphQL APIs and optimized performance with Redis.
- Implemented Cron jobs and queues for scheduled and background task processing.
- Applied JWT authentication and role-based access control (RBAC) for secure access.
- Used Docker for environment setup and deployment.
- Managed code with Git, GitHub, GitLab, and integrated CI/CD.
- Documented APIs with Swagger for improved developer usability.
- Created SQL stored procedures, functions, and triggers to optimize data access and ensure integrity.
- Integrated Mailgun for automated emails and Firebase Cloud Messaging for push notifications.
- Implemented activity logging for user tracking and system monitoring.

Eazy Partner Solution Co.,Ltd
Web Developer
2021- 2023

- Developed a property management system for leasing, sales, and operations of properties and parking management system.
- Built responsive web applications using HTML, CSS, JavaScript, jQuery, and Alpine.js.
- Designed and implemented complex features with PHP, Laravel, and Livewire.
- Optimized application performance and user experience through data analysis.
- Collaborated with UX/UI teams for seamless design integration.
- Worked with REST APIs, leveraging hands-on experience.
- Continuously learned and adapted to the latest web development technologies.
