Experiences

Durian Inn Co,Ltd
Senior Software Developer — March 2026- Present

- Architected a multi-vertical food and express delivery platform : 10+ Architected core microservices (Files , Sms/Email, Identity, Otp, Merchant, Rider, Wallet, Orders, Express, Delivery Dispatch, Call, Notification, Rating) using .NET 8, Clean Architecture, and CQRS, establishing clear domain boundaries and high system availability.
- Implemented event-driven synchronization across services using Apache Kafka and Debezium CDC, eliminating data mismatch and dual-write issues.
- Engineered real-time driver tracking and geofencing by combining Redis GeoSets, PostgreSQL/PostGIS, and SignalR WebSockets for live dispatch updates.
- Built automated batch workflows with Apache Airflow to handle scheduled ETL, data synchronization across microservices, and system maintenance.
- Integrated ERPNext REST APIs to automate transaction settlement and ledger reconciliation, removing manual intervention and accounting mismatches.
- Modular Admin Portals: Involved in building modular admin portals (Sales, Merchant, AR, Operations) using Vue 3, TypeScript, PrimeVue, and Tailwind CSS for streamlined management and auditing.
- Telegram Ecosystem Integration: Involved in building automated Telegram Bot alerts for real-time logs and developing Telegram Mini Apps for mobile user and merchant accessibility.

Aibodia
Full-Stack Web Developer — July 2025 - Feb 2026

- Full-Stack Development Delivered a messaging and live streaming platform as the core product; built a full-stack management system using Nuxt.js for data and content administration.
- Backend & Real-Time Services Designed, developed, and documented high-performance RESTful APIs using NestJS and Golang to support scalable real-time applications.
- Streaming & Communication – Implemented low-latency live streaming with Agora, real-time chat using GetStream, and bidirectional communication via Socket.IO.

CodeClans
Full-Stack Web Developer — Jan 2023 – Jun 2025

- Full-Stack Development web apps using Laravel, Vue.js, and modern frontend stack; built and consumed RESTful APIs with AJAX and secure authentication.
- Backend services with ASP.NET and NestJS and across PostgreSQL, MySQL, and SQL Server; optimized performance via Redis, Cron jobs, and message queues.
- Security & DevOps Applied JWT and RBAC for access control; containerized with Docker and managed CI/CD via GitHub/GitLab.
- Data & Integrations Built stored procedures, functions, and triggers for data integrity; integrated Mailgun, Firebase FCM, activity logging, and Swagger API documentation.

Eazy Partner Solution Co.,Ltd
Web Developer — Jan 2021 - Dec 2023

- Full-Stack Development Built a property and parking management system covering leasing, sales, and operations; developed responsive UIs with HTML, CSS, JavaScript, jQuery, and Alpine.js.
- Backend Designed and implemented complex features using PHP, Laravel, and Livewire; integrated RESTful APIs and optimized application performance through data-driven analysis.
- Collaboration & Growth Partnered with UX/UI teams for seamless design integration; consistently adopted emerging web technologies to stay current with industry standards.
